

Check accuracy while making Tiny & Mini Dresden plates

SUZN QUILTS...

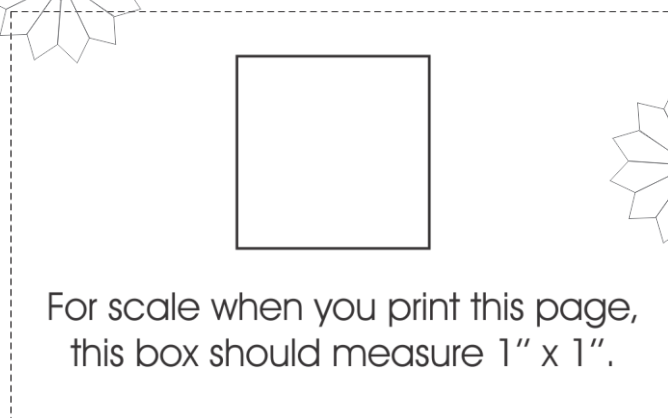

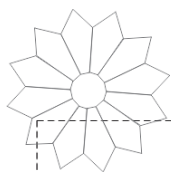

Are you sewing an accurate scant 1/4"?

Test your seam allowance by laying 2
Dresden petals sewn together over these models.

They should be exactly these sizes
including the seam allowance.

If your samples are not the same as these,
I highly recommend using Perkins Dry Goods'
Perfect Piecing Seam Guide to help you.

If your sample is bigger, your seam allowance is too small.
If your sample is smaller, your seam allowance is too big.

For scale when you print this page,
this box should measure 1" x 1".

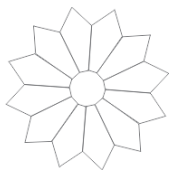

If box is not 1" be sure your printer is printing
"actual size" not "fit to page".

After sewing 2 Tiny Dresden petals
together they should be this size.

After sewing 2 Mini Dresden petals
together they should be this size.
